

WILDLIFE
PROGRAMMING

NORTH AMERICA

7 x 60 / Discovery Channel / 2009 / ID: 26031

North America: where civilisation collides with untamed wilderness. Join us as we step into this hidden world teeming with life-across impossible mountains and endless deserts. Dive into unexplored forests and crash into rugged coasts. Wild animals living in these astonishing and sometimes deadly habitats must be fiercely resilient- evoking the human spirit for which the continent is known.

BEAR FEEDING FRENZY

1 x 60 / Discovery Channel / 2007 / ID: 25924

Host Chris Douglas ventures into the Alaskan bush to locate and study large grizzly bears. Chris and bear expert Tom Smith set out to learn and observe various behaviours and features of the bears and how they relate to the bear's predatory instincts. They provide in-depth answers and knowledge that may prevent bear attacks.

CROCODILE FEEDING FRENZY

1 x 60 / Discovery Channel / 2008 / ID: 25925

Host Chris Douglas heads into the everglades, to locate and study crocodiles and alligators. Through a series of controlled experiments, Chris and reptile expert Donald Schultz set out to learn and observe various behaviours and features of crocodilians and how they relate to the animals' predatory instincts.

INTO THE LION'S DEN

1 x 120 / Animal Planet / 2005 / ID: 110996

Zoologist and big cat trainer Dave Salmoni is on a mission to prove that humans can live in harmony with wild lions. He is pioneering a new research project that has never been attempted before – removing the barrier between man and beast by walking in on a pride of lions to observe, learn the language and gain social acceptance.

NIGHT

20 x 30 / Animal Planet / 2008 / ID: 123938

Host and animal expert Brandon McMillan takes viewers into the darkness to experience the terror of nocturnal nature and its animal activities. From sunset to sunrise, follow Brandon on a global search for answers: what does it mean to be nocturnal? Where do nocturnal creatures exist? And why do they scare us to death?

LION FEEDING FRENZY

1 x 60 / Discovery Channel / 2008 / ID: 25923

Host Chris Douglas heads out on the African plains to locate and study the majestic lion. Through a series of controlled experiments, Chris and lion expert Scott Lope set out to learn and observe various behaviors of the lions and how they relate to the lion's predatory instincts.

NATURE'S DEADLIEST

4 x 60 / Discovery Channel / 2009 / ID: 25993

From hippos and scorpions to lions and a contingent of snakes, witness the lethal weaponry of the natural world's most deadly creatures. Through reconstruction and scientific analysis, Nature's Deadliest steps through the fatal moments of an attack. For many, these awesome creatures inspire fear. But in truth, they should be respected.

MAGIC OF THE BIG BLUE

7 x 60 / Discovery Channel / 2011 / ID: 136252

Never before has the underwater world been filmed this beautifully. Magic of the Big Blue is a seven-part series, featuring the seas and oceans surrounding the seven continents. Filmed by one of the world's best underwater photographers, Darek Sepiolo's passion for diving and the wonders of the deep grants us access to worlds far beneath the surface, worlds many of us would never get to experience.

Program Sales and Home Video opportunities available worldwide for majority of titles listed. Confirm final rights with your sales representative. To view our full genre list, please visit:

CLASH OF THE DINOSAURS

4 x 60 / Discovery Channel / 2009 / ID: 25848

Dinosaurs were the ultimate prehistoric survival machines, ruling the Earth for 120 million years. Hidden inside their bodies are anatomical secrets to surviving prehistoric planet Earth. Combining cinematic photo-real 3D graphics and leading-edge anatomy and paleontology, we peel back their skin and their brains to reveal the unique inner workings of the greatest beasts that ever lived.

PREHISTORIC ASSASSINS

2 x 60 / Discovery Channel / 2009 / ID: 26043

Journey across time to a planet Earth that seems otherworldly and meet creatures that seem alien. Skies dominated by the screeching pterodactyl, seas patrolled by the freakish anomalocaris and lands savaged by the saber-tooth tiger. See how they hunted, how their incredible predatory tools evolved and how they ultimately disappeared.

MONSTERS RESURRECTED

6 x 60 / Discovery Channel / 2008 / ID: 25871

Meet six mega beasts: spinosaurus, megalania, the terror bird, acrocanthasaurus, mosasaur and the bear dog – all brought back to life using fossils and modern technology. Scientists reveal how these mysterious creatures functioned and behaved, what they looked like, how they fought, what they ate...and what ate them.

INTO THE PRIDE

5 x 60 / Animal Planet / 2008 / ID: 124534

Animal Planet's large predator expert, Dave Salmoni, heads deep into the African bush to return to his wild roots and to save a rogue pride of lions from elimination. Can he get close enough to gain their trust so that man and beast can live together?

LIFE FORCE

Series 1-2: 12 x 60 / 2014 / ID: 149392, 149394

A celebration of the power of evolution and an exploration of the forces that shape life in all its unexpected glory, viewers are transported to six strange worlds within worlds where it seems as if nature has thrown the rule book out the window. In a groundbreaking cross-genre fusion of blue-chip natural history and cutting-edge science documentary, Life Force reveals how the magic of evolution and the forces of nature have together shaped eccentric animals, eclectic lifestyles and unorthodox patterns of behavior.

PENGUINS ON A PLANE: GREAT ANIMAL MOVES

2 x 60 / 2013 / ID: 145856

With access to a range of animal transport companies, zoos and aquariums, follow the expert handlers entrusted with moving some of the world's most precious and challenging cargo. From a hippo on the move from a West Midlands safari park to a zoo in France and 12 penguins going on a 12,000-mile plane journey from New Zealand to England in a refrigerated "penguin hotel," see the logistical challenges associated with moving each animal.
