Salvage Dawgs is a trip into a world of shrewd negotiations as Robert Kulp and Mike Whiteside, co-owners of one of the premier architectural salvage operations in the United States, Black Dog Salvage, bid on homes and buildings condemned to be demolished. Their goal is to secure the remarkable pieces of America’s past hidden inside these old structures before they are lost forever. These salvaged vintage pieces include everything from doors and windows to mantels and more. Once they are recovered, the guys sell these valuable pieces to a wide range of clients, from construction workers to high-end interior designers, who use them to restore other historical buildings and add character to newer structures.

Three teams of hard working Texas real estate entrepreneurs compete head-to-head in a fast-paced and thrilling real estate flipping competition. Our flippers are under the gun to buy low, work fast and sell high. But they have one major hurdle to overcome: when they buy a house at auction, they have to move it off the property that day – a task that can be downright dangerous. Once the house is moved to their lot, it’s a race against time to get it renovated and ready for auction. Who will turn the biggest profit? Who will gamble it all and lose big? Who will destroy their house mid-move? And who will get their chops busted by their annoying rivals?
Couples learn what it really means to downsize when they take the plunge into the tiny house real estate market. At an average size of only 180-square-feet, watch as clients meet with their builders or decide to build these tiny homes all by themselves, and follow along through the construction process until the house is complete.

Tiny home builders make luxurious custom homes that can all hit the highway so their clients can live however they want, wherever they want. In each episode we’ll see a tiny home built from start to finish as this team works to fit every single client wish item into a space suited to travel anywhere.

Couples build tiny homes in idyllic locations. From a glass house on the beaches of Mexico to a Colorado mountain retreat designed out of a sheep wagon, these adventurous homeowners follow their dreams to build their own small slice of paradise.

You never know what you’ll be bringing home from the home improvement store. You go in for grass seed and if you’re lucky, you could bring home a professional contractor. On DIY Network’s Yard Crashers, our expert searches the store looking for home owners with really bad backyards. Once they find their target, our expert follows the surprised shoppers home and completely transforms their yard.
