One man ventures where no man has gone before – literally into the belly of the beast.

Snake expert Paul Rosolie will risk life and limb to show the world what happens when he’s eaten alive by a giant anaconda.

Discover the essence of feline fluffiness and canine cuteness as we count down the cutest pet videos from the web – from the mini pig that plays the piano to a cat that prefers the friendship of a dolphin, these pets are sure to cause ear-to-ear smiles!

Ten people are dead. Three are eaten.

Each time, the killer slips away. Using state-of-the-art tools and centuries-old techniques, hunters and forestry officers head out to find the beast that public has in terror and the government will do anything to wipe it out. As the search area is vast and deaths in the killer’s path increase, can they stay ahead in time before another person dies?

Which do you think is more deadly: an attack from a slow loris or a squirrel monkey? Are you more likely to survive being overweight or underweight? Through amazing footage, experiments and real-life case studies, the series goes behind some scientific myths to uncover the unique, and sometimes strange, ways to stay alive in life-threatening situations. Explore the science in a series that offers both the smartest choice in each deadly dilemma.

Razor-sharp teeth, killer instincts and senses to perceive the faintest movement and hear your breath, and now they’re targeting humans. These shows go to the epicenter of terror in Siberia and Central America to unveil wolf power and appetite and the prowess of ravenous big cats that defeat unstoppable odds to kill. But can anything stop this perfect storm of killers from growing out of control?

Marked by the Mob

See the true stories behind some of the most famous mob hits in history, played out in vivid, dynamic animation. For over a century, the mob has been a violent component of America’s underbelly. The mob has its own rules and its own way of doing things. When problems arise, it settles them through bloodshed. Whether it’s about honor, power or a personal grudge, offenders usually pay with their lives. The methods of execution vary, from something as simple as a pocketknife to a complex, yet perfectly built bomb. In the world of the mob no one is ever safe and no one goes quietly. Because you’re as good as dead when you are Marked by the Mob.

Live Fire

Live Fire puts the audience through the toughest training of the American military. 3D cameras take you behind the scenes and into the field with squads of soldiers and Marines to experience the transformation of raw recruits to battle-ready warriors. Marine “grunts” experience hardcore weapon training at the School of Infantry and U.S. Army soldiers face rioting insurgents in a simulated Iraqi village. It’s a complete immersion into real war fighting conditions – under brutal conditions, with real guns and real bullets.

Scary Tales

Scary Tales is series so weird and fantastic, it needs an extra dimension just to contain itself. There are marauding giants, ghost-plagued forests and barren villages – a place where cannibals feast, librarians terrify and bodies turn up behind every tree. Inanimate objects come to life, and the innocent are punished. It’s a world that really exists, if only in your own subconscious.
