Deadliest Catch: Deckhands

While the captains are the brains behind the operation, take a trip on deck to meet the heart, soul, and muscle of every crab boat - the deckhands. Find out what it takes to make it as a deckhand and meet the men who seek their fortunes on the edge of the earth.

Deadliest Catch: Greenhorns

The Bering Sea is violent, unpredictable and dangerous. It churns up the saltiest fishing vets and spits them out without thinking twice. And the new guys? The rookies? The greenhorns? They barely stand a fighting chance. But if you're trying to break into the crab-fishing industry, trial by fire is your only choice.

Some of the planet's most extreme conditions won't deter a handful of men and women whose very livelihoods depend on mining the wet and frozen gold hidden under four feet of solid ice. Split second thinking, extreme focus, and team work are key to staying alive under the ice. The risks are great, but the payoff could be even greater if these gold mining boats can keep turning a profit, even as the ice takes a toll on the men who are the black waters of the Bering Sea behind.

For the true northern fishermen of the Bering Sea, death is always just a shot away. In this special we highlight the top ten close calls of the seventh season of the Deadliest Catch, from the near-death experiences to major injuries. We relive all the Coast Guard rescues and hear exclusive interviews from the men who stared death in the face and lived to tell about it.

Flying Wild Alaska

In the wilds of Alaska’s Bering Sea, the only way in and out is by bush plane. It is a world of extreme weather and dangerous conditions where the Tweto family - husband Jim, wife Ferno, and their daughters Ariel and Ayla - operate Alaska’s largest regional airline, Era Alaska.

This time around the Twetos are up against the worst winter Alaska has seen in decades. Find out if their planes can make it through for the native communities whose survival depends on air travel.

Yukon Men

There’s a town deep in the remote interior of Alaska with no roads in or out, where wolves howling through the frigid night air reminds the 200 people living there just how isolated they really are. ‘Yukon Men’ is the story of the men who fight to make it through the winter and battle life-threatening conditions just to survive.

The Magic of the Big Blue

Never before has the underwater world been filmed this beautifully. The Magic of the Big Blue is a seven-part series featuring the seas and oceans surrounding the seven continents. Filmed by one of the world’s best underwater photographers, Darek Sepiolo’s passion for diving and the wonders of the deep grants us access and makes us closer to worlds far beneath the surface, worlds many of us would never get to experience.

Captain Marinesko: Attack of the Century

Meet Captain Alexander Marinesko, the most legendary hero of the Russian Navy submarine fleet. He was responsible for the destruction of German ships Wilhelm Gustloff and General von Steuben, and the last officer of World War II to receive the title of “Hero of the Soviet Union.” Relive his infamous victories that accounted for the greatest sudden loss of German life during the war.

Spy Duels

In this remarkable series we explore the complexities of intelligence and counter-espionage work orchestrated by the world’s leading powers. For the first time, veterans and historians of the special secret services, as well as former heads of reconnaissance divisions, contribute to this production. Learn how the spies from each nation influenced each other and fueled some of the most secret competitions waged in history.

Devil’s Triangle

On December 5th, 1945, six American planes and their twenty-seven crew members disappeared forever near Bermuda. What remains is their cryptic last message to radio operators: “Emergency in the air! We do not see the earth! We do not know where west is! Do not follow us!” Since that day, more than one hundred planes and seventy-six ships have gone missing in the Bermuda Triangle. Its infamy is legendary as one of the last true mysteries of our planet.
